Volume 159 1986

Table of contents

No. 1 1–214 issued on August 15, 1986
No. 2 215–424 issued on September 1, 1986
No. 3 425–632 issued on September 15, 1986

Nomenclature of glycoproteins, glycopeptides and peptidoglycans
IUPAC-IUB Joint Commission on Biochemical Nomenclature (JCBN) 1– 6

Nucleic acids, protein synthesis, and molecular genetics

Tarantula hemocyanin mRNA – *In vitro* translation, cDNA cloning and nucleotide sequence corresponding to subunit *e*
R. Voit and H.-J. Schneider 23– 29

Structural analysis of poly(ADP-ribose) polymerase in higher and lower eukaryotes
A. I. Scovassi, R. Izzo, E. Franchi and U. Bertazzoni 77– 84

Conformational analysis of the octamer d(G-G-C-C-G-G-C-C) in aqueous solution – A one-dimensional and two-dimensional proton NMR study at 300 MHz and 500 MHz
L. J. Rinkel, M. R. Sanderson, G. A. van der Marel, J. H. van Boom and C. Altona 85– 93

Induction of polynucleotide-protein cross-linkages by ultraviolet irradiation – Peculiarities of the high-intensity laser pulse irradiation
E. I. Budowsky, M. S. Axentyeva, G. G. Abdurashidova, N. A. Simukova and L. B. Rubin 95–101

Structural characteristics and classification of some tRNA-binding sites of elongating *Escherichia coli* ribosome
G. G. Abdurashidova, I. O. Baskayeva, A. A. Chernyi, L. B. Kaminir and E. I. Budowsky 103–109

Natural selection versus primitive gene structure as determinant of codon usage
J. T.-F. Wong and R. Cedergren 175–180

Sequence-specific DNA-binding proteins which interact with (G + C)-rich sequences flanking the chicken c-*myc* gene
V. V. Lobanenkov, R. H. Nicolas, M. A. Plumb, C. A. Wright and G. H. Goodwin 181–188

The γ_1 and γ_2 subunits of human liver alcohol dehydrogenase – cDNA structures, two amino acid replacements, and compatibility with changes in the enzymatic properties
J.-O. Höög, L.-O. Hedén, K. Larsson, H. Jörnvall and H. von Bahr-Lindström 215–218

Structure and drug inducibility of the human cytochrome P-450c gene
K. Kawajiri, J. Watanabe, O. Gotoh, Y. Tagashira, K. Sogawa and Y. Fujii-Kuriyama 219–225

Characterization of the phosphoproteins of *Escherichia coli* cells by electrophoretic analysis
J.-C. Cortay, C. Rieul, B. Duclos and A. J. Cozzone 227–237

Cross-linking of bromodeoxyuridine-substituted oligonucleotides to the *Eco*RI and *Eco*RV restriction endonucleases
H. Wolfes, A. Fliess, F. Winkler and A. Pingoud 267–273

Cloning and sequencing of the gene encoding cytochrome c_3 from *Desulfovibrio vulgaris* (Hildenborough)
G. Voordouw and S. Brenner 347–351

Characterization of inverted repeated sequences in *Ascaris* nuclear DNA
P. Landolt and H. Tobler 435–442

The light-dependent accumulation of the P700 chlorophyll *a* protein of the photosystem I reaction center in barley – Evidence for translational control
K. Kreuz, K. Dehesh and K. Apel 459–467

The mouse myoglobin gene – Characterisation and sequence comparison with other mammalian myoglobin genes
A. Blanchetot, M. Price and A. J. Jeffreys 469–474

Regulated expression of cloned human fetal $^{A}\gamma$-globin genes introduced into murine erythroleukemia cells
P. Charnay and L. Henry 475–478

Aminoacylaminonucleoside inhibitors of protein synthesis – A new approach for evaluating their potency
D. A. Theocharis, D. L. Kalpaxis and C. Coutsogeorgopoulos 479–483

Multispecific DNA methyltransferases from *Bacillus subtilis* phages – Properties of wild-type and various mutant enzymes with altered DNA affinity
U. Günthert, R. Lauster and L. Reiners 485–492

Isolation of human-p53-specific monoclonal antibodies and their use in the studies of human p53 expression
L. Banks, G. Matlashewski and L. Crawford 529–534

Molecular cloning and sequencing of salmon gonadotropin β subunit
K.-Y. Trinh, N. C. Wang, C. L. Hew and L. W. Crim 619–624

Structural analysis of the sequence coding for an inducible 26-kDa protein in human fibroblasts
G. Haegeman, J. Content, G. Volckaert, R. Derynck, J. Tavernier and W. Fiers 625–632

Protein chemistry and structure

Proteolytically induced variations in the enzymatic properties of tissue plasminogen activator – Activations, inactivations and reactivations
B. Norrman, G. Pohl, H. Jörnvall and P. Wallén 7– 13

Elicitation of thiomolybdates from the iron-molybdenum cofactor of nitrogenase – Comparison with synthetic Fe-Mo-S complexes
W. E. Newton, S. F. Gheller, B. Hedman, K. O. Hodgson, S. M. Lough and J. W. McDonald 111–115

A camel milk whey protein rich in half-cystine – Primary structure, assessment of variations, internal repeat patterns, and relationships with neurophysin and other active polypeptides
O. U. Beg, H. von Bahr-Lindström, Z. H. Zaidi and H. Jörnvall 195–201

Isolation and characterisation of a lectin from tulip bulbs, *Tulipa gesneriana*
Y. Oda and K. Minami 239–245

Use of a trypsin-pulse method to study the refolding pathway of ribonuclease
K. Lang and F. X. Schmid 275–281

Immunogenicity of loop-structured short synthetic peptides mimicking the antigenic site A of influenza virus hemagglutinin
U. Schulze-Gahmen, H.-D. Klenk and K. Beyreuther 283–289

Relationship between the cysteine-proteinase-inhibitory function of rat T kininogen and the release of immunoreactive kinin upon trypsin treatment
T. Moreau, N. Gutman, A. El Moujahed, F. Esnard and F. Gauthier 341–346

Sulfite oxidase from chicken liver – The role of imidazole and carboxyl groups for the reaction with cytochrome *c*
M. Ritzmann and H. R. Bosshard 493–497

Effect of tropomyosin on the interactions of actin with actin-binding proteins isolated from pig platelets
G. Prulière, A. d'Albis and E. Der Terrossian 535–547

Structure predictions and surface charge of nitrogenase flavodoxins from *Klebsiella pneumoniae* and *Azotobacter vinelandii*
M. H. Drummond 549–553

Modification of the actin interface of skeletal myosin subfragment-1 by treatment with dibromobimane
D. Mornet, K. Ue, P. Chaussepied and M. F. Morales 555–561

Structural differences around hormonogenic sites on thyroglobulins from different species detected by monoclonal antibodies
C.-T. J. Chan, P. G. H. Byfield, M. Callus, B. Champion and R. L. Himsworth 563–567

Structural and immunological comparison of human thrombospondins isolated from platelets and from culture supernatants of endothelial cells and fibroblasts – Evidence for a thrombospondin polymorphism
P. Clezardin, N. R. Hunter, J. W. Lawler, D. A. Pratt, J. L. McGregor, D. S. Pepper and J. Dawes 569–579

The aromatic ^{1}H-NMR spectrum of plasminogen kringle 4 – A comparative study of human, porcine and bovine homologs
V. Ramesh, M. Gyenes, L. Patthy and M. Llinás 581–595

The amino-acid sequence of the 2S sulphur-rich proteins from seeds of Brazil nut (*Bertholletia excelsa* H.B.K.)
C. Ampe, J. Van Damme, L. A. B. de Castro, M. J. A. M. Sampaio, M. Van Montagu and J. Vandekerckhove 597–604

Characterization of a β-galactosidase hybrid protein carrying the catalytic domain of *Escherichia coli* adenylate cyclase
I. Crenon, D. Ladant, N. Guiso, A.-M. Gilles and O. Bârzu 605–609

Enzymology

Structure and properties of casein kinase-2 from *Saccharomyces cerevisiae* – A comparison with the liver enzyme
F. Meggio, N. Grankowski, W. Kudlicki, R. Szyszka, E. Gasior and L. A. Pinna 31– 38

Interaction of enzymes involved in triosephosphate metabolism – Comparison of yeast and rabbit muscle cytoplasmic systems
P. Tompa, J. Bär and J. Batke 117–124

Kinetic implications of the occurrence of several relaxations in the conformational transition of mnemonical enzymes
J. Ricard, J.-M. Soulié, J. Buc and M. Bidaud 247–254

Cryoenzymological study of aspartate aminotransferase – Detection of intermediates by monitoring single turnovers with a true substrate
H. Gehring 291–296

Purification and properties of phospho-fructokinase 2/fructose 2,6-bisphosphatase from chicken liver and from pigeon muscle
E. Van Schaftingen and H.-G. Hers 359–365

Reaction of phosphofructokinase 2/fructose 2,6-bisphosphatase with monoclonal antibodies – A proof of the bifunctionality of the enzyme
E. Van Schaftingen, P. G. Coulie, J. Van Snick and H.-G. Hers 367–373

Dependence of the substrate specificity and kinetic mechanism of horse-liver alcohol dehydrogenase on the size of the C-3 pyridinium substituent – 3-Benzoylpyridine – adenine dinucleotide
J.-P. Samama, D. Hirsch, P. Goulas and J.-F. Biellmann 375–380

The interactions of cytochrome *c* and porphyrin cytochrome *c* with cytochrome *c* oxidase – The resting, reduced and pulsed enzymes
J. A. Kornblatt and H. A. Luu 407–413

Carbohydrates, lipids and other natural products

Primary structure of the neutral carbohydrate chains of hemocyanin from *Panulirus interruptus*
J. A. Van Kuik, H. Van Halbeek, J. P. Kamerling and J. F. G. Vliegenthart 297–301

The structure of the *O*-glycosidic oligosaccharide chains of the major *Zajdela* hepatoma ascites-cell-membrane glycoprotein
F. Nato, C. Goulut, R. Bourrillon, H. Van Halbeek and J. F. G. Vliegenthart 303–308

Catabolism of glycoprotein glycans – Characterization of a lysosomal endo-N-acetyl-β-D-glucosaminidase specific for glycans with a terminal chitobiose residue
T. Baussant, G. Strecker, J.-M. Wieruszeski, J. Montreuil and J.-C. Michalski 381–385

Physical biochemistry

The effects of pressure on yeast cytochrome *c* peroxidase
J. A. Kornblatt, A. M. English and G. Hui Bon Hoa 39– 43

The hydrophobic moment of the amphipathic helix of salmon calcitonin and biological potency
R. M. Epand, J. K. Seyler and R. C. Orlowski 125–127

The cobalt-nitrosyl stretching vibration as a sensitive resonance Raman probe for distal histidine-nitrosyl interaction in monomeric hemoglobins
N.-T. Yu, H. M. Thompson, H. Mizukami and K. Gersonde 129–132

Purification and structural analysis of pyocyanin and 1-hydroxyphenazine
D. Watson, J. MacDermot, R. Wilson, P. J. Cole and G. W. Taylor 309–313

Membranes and bioenergetics

Interaction of vasoactive intestinal peptide (VIP) and N-terminally modified VIP analogs with rat pancreatic, hepatic and pituitary membranes
P. Robberecht, D. H. Coy, P. De Neef, J.-C. Camus, A. Cauvin, M. Waelbroeck and J. Christophe 45– 49

Synthesis of ATP by soluble mitochondrial F_1 ATPase and F_1–inhibitor-protein complex in the presence of organic solvents
A. Gómez Puyou, M. Tuena De Gómez Puyou and L. de Meis 133–140

The phospho*enol*pyruvate-dependent fructose-specific phosphotransferase system in *Rhodopseudomonas sphaeroides* – Evidence for a shift in the midpoint potential of the dithiol redox center during turnover of the carrier
J. S. Lolkema and G. T. Robillard 141–147

Calcium transport in membrane vesicles of *Streptococcus cremoris*
A. J. M. Driessen and W. N. Konings 149–155

Photosystem I reaction centers from maize bundle-sheath and mesophyll chloroplasts lack subunit III
R. Nechushtai, G. Schuster, N. Nelson and I. Ohad 157–161

Cytosolic adenylates and adenosine release in perfused working heart – Comparison of whole tissue with cytosolic non-aqueous fractionation analyses
R. Bünger and S. Soboll 203–213

Kinetics of ATP hydrolysis catalyzed by isolated TF_1 and reconstituted TF_0F_1 ATPase
M. Rögner and P. Gräber 255–261

Overproduction, isolation and determination of the amino-terminal sequence of the SecY protein, a membrane protein involved in protein export in *Escherichia coli*
Y. Akiyama and K. Ito 263–266

Fusion of rat erythrocytes by membrane-mobility agent A_2C-depends on membrane proteolysis by a cytoplasmic calpain
T. Glaser and N. S. Kosower 387–392

Calcium release from calmodulin and its C-terminal or N-terminal halves in the presence of the calmodulin antagonists phenoxybenzamine and melittin measured by stopped-flow fluorescence with Quin 2 and intrinsic tyrosine – Inhibition of calmodulin-dependent protein kinase of cardiac sarcoplasmic reticulum
J. Suko, W. Wyskovsky, J. Pidlich, R. Hauptner, B. Planck and G. Hellmann 425–434

Identification of two distinct regions within the binding sites for fibrinogen and fibronectin on the IIb–IIIa human platelet membrane glycoprotein complex by monoclonal antibodies P2 and P4
J. L. McGregor, L. McGregor, A.-S. Bauer, B. Catimel, J. Brochier, M. Dechavanne and K. J. Clemetson 443–449

Further characterization of an early expressed glycoprotein of the rabbit small intestinal brush border – Its interaction with some hydrolases
J.-P. Gorvel, A. Rigal, A. Bernadac and S. Maroux 499–505

β-Alanine transport in synaptic plasma membrane vesicles from rat brain – Efflux, exchange and stoichiometry
L. Agullo, B. Jimenez, C. Aragón and C. Giménez 611–617

Cellular biochemistry and metabolism

Hormonal regulation of the tricarboxylic acid cycle in the isolated perfused rat liver
T. B. Patel 15– 22

Proteins from rat liver cytosol which stimulate mRNA transport – Purification and interactions with the nuclear envelope mRNA translocation system
H. C. Schröder, M. Rottmann, M. Bachmann, W. E. G. Müller, A. R. McDonald and P. S. Agutter 51– 59

Expression of intracellular fibrinogen on the surface of stimulated platelets
G. Courtois, J.-J. Ryckewaert, V. L. Woods, M. H. Ginsberg, E. F. Plow and G. A. Marguerie 61– 67

The effects of platelet-derived transforming growth factor β on normal human diploid gingival fibroblasts
J. L. Wrana, J. Sodek, R. L. Ber and C. G. Bellows 69– 76

Membrane-bound hydroxylases in elicitor-treated bean cells – Rapid induction of the synthesis of prolyl hydroxylase and a putative cytochrome P-450
G. P. Bolwell and R. A. Dixon 163–169

Isolation and characterization of mutants from *Schyzosaccharomyces pombe* defective in glycerol catabolism
C. Gancedo, A. Llobell, J. C. Ribas and F. Luchi 171–174

^{13}C NMR evidence for bacteriochlorophyll *c* formation by the C_5 pathway in green sulfur bacterium, *Prosthecochloris*
T. Oh-hama, H. Seto and S. Miyachi 189–194

Purification and characterization of heme-containing low-activity form of catalase from greening pumpkin cotyledons
J. Yamaguchi, M. Nishimura and T. Akazawa 315–322

Prokaryotic features of a nucleus-encoded enzyme – cDNA sequences for chloroplast and cytosolic glyceraldehyde-3-phosphate dehydrogenases from mustard (*Sinapis alba*)
W. Martin and R. Cerff 323–331

Binding of low-density lipoprotein and chylomicron remnants to the hepatic low-density lipoprotein receptor of dogs, rats and rabbits demonstrated by ligand blotting – Failure to detect a distinct chylomicron-remnant-binding protein by ligand blotting
D. P. Wade, B. L. Knight and A. K. Soutar 333–340

Gastric inhibitory polypeptide receptor in hamster pancreatic beta cells – Direct cross-linking, solubilization and characterization as a glycoprotein
B. Amiranoff, A. Couvineau, N. Vauclin-Jacques and M. Laburthe 353–358

Coupling of carbon monoxide oxidation to CO_2 and H_2 with the phosphorylation of ADP in acetate-grown *Methanosarcina barkeri*
M. Bott, B. Eikmanns and R. K. Thauer 393–398

The effects of metyrapone, chalcone epoxide, benzil, clotrimazole and related compounds on the activity of microsomal epoxide hydrolase *in situ*, in purified form and in reconstituted systems towards different substrates
J. Seidegård, J. W. DePierre, T. M. Guenthner and F. Oesch 415–423

Differential inhibition of prostaglandin and superoxide production by dexamethasone in primary cultures of rat Kupffer cells
P. Dieter, A. Schulze-Specking and K. Decker 451–457

Control of a futile urea cycle by arginine feedback inhibition of ornithine carbamoyltransferase in *Agrobacterium tumefaciens* and *Rhizobia*
S. Vissers, C. Legrain and J.-M. Wiame 507–511

Carbohydrate-dependent induction of fatty acid synthase in primary cultures of rat hepatocytes
S. Giffhorn-Katz and N. R. Katz 513–518

The alternative oxidase of *Candida parapsilosis*
M. Guérin and N. Camougrand 519–524

Developmental biochemistry and immunology

Cooperative effect of thyroid and glucocorticoid hormones on the induction of hepatic phospho*enol*pyruvate carboxykinase *in vivo* and in cultured hepatocytes
W. Höppner, W. Süssmuth, C. O'Brien and H. J. Seitz 399–405

Oral immunization with a synthetic peptide of cholera toxin B subunit – Obtention of neutralizing antibodies
A. Guyon-Gruaz, A. Delmas, S. Pedoussaut, H. Halimi, G. Milhaud, D. Raulais and P. Rivaille 525–528

Indexed in *Current Contents*
